

# Nature Zap

Broadleaf Weed Killer

## FOR **BEST RESULTS!**

Please use this Twist and Count technique below to achieve the **best results** for killing your weeds with your new NatureZap.

## TWIST AND COUNT

The environmentally safe way to eliminate weeds using the NatureZap.

→ Use a "Twist And Count" process for best results

1. Stab the weed
2. Push the NatureZap into the crown of the weed
3. Twist it while applying light pressure and counting the 3-7 seconds required to kill the weed.

→ A convenient way to keep track of the seconds is to twist the unit back and forth while counting off the seconds.

→ The twisting action improves 'the kill' factor of the weed.

Happy gardening from Global Neighbor, Inc!
